## TIMBER FURNITURE MAINTENANCE

---

Peace of mind is guaranteed as the finest quality workmanship is carried out during construction. A 5-year warranty is offered on all Cranbrook Workshop timber products (excluding cushions and fabric). Cranbrook Workshop chooses to work with Accoya as its natural characteristics are perfectly suited to the harsh Australian climate. Accoya is not susceptible to checking or warping and outperforms Australian Hardwoods significantly when untreated outdoors.

Cranbrook Workshop recommends leaving the timber to wear naturally in the outdoor environment. The result is a silver-grey finish where most stains that occur in the onset (such as watermarks) will fade naturally over time as the timber starts to weather. An unwanted noticeable stain can be removed by sanding back the timber with a 120-grit sandpaper. Due to Accoya being a natural product small cracks and splits will occur over time however these will not affect the structural integrity of the furniture.

To accelerate the weathering process (which can take anywhere from 6 months to several years depending on the level of exposure) give the timber a good hose down a few times on grass or gravel and leave in the sun.

For cleaning of timber products, we recommend using Intergrain Ultra Prep Timber Cleaner as it will help restore and prepare weathered, grey, rust or tannin stained, mould or mildew affected timber to a clean appearance. Please visit [www.intergrain.com.au](http://www.intergrain.com.au) for further cleaning instructions using Ultra Prep Timber Cleaner. Ensure to remove any upholstery prior to cleaning of sofa and armchair frames.

If you wish to stain or paint the timber furniture after purchase, Cranbrook Workshop recommends using products from the Resene range. Please be aware that staining or painting timber furniture will result in regular maintenance and continual application. Our standard cushions are reticulated quick dry foam with Westbury Outdoor Solution Dyed Acrylic fabrics. If the cushions get wet during a downpour, place them in sunny area for half a day to allow them to dry through.

Please refer to the Westbury Textiles care sheet for further cleaning and care instructions. Quick Dry foam is an advanced, high-performance foam designed specifically for outdoor cushions. Quick Dry foam is produced by a sophisticated process called Hydro-Blast Reticulation. Carefully selected high grade material combined with a unique process creates a foam with extreme durability and strength. This is what gives Quick Dry foam its unique porous open cell structure. The large, open pores in the foam allows water to drain rapidly and fresh air to circulate freely and continuously. The Quick Dry foam feels comfortable and luxurious but is also strong and supportive, ensuring the cushions keep their shape overtime. The foam uses anti-microbial technology which prevents the growth of common molds and fungus.

### TIMBER FURNITURE WARRANTY

---

As timber is a natural material, tonal differences among the various elements may occur. Moreover, if the products are purchased at different periods the elapsed time and climatic conditions may cause variations in colour and tone and Cranbrook Workshop cannot accept any responsibility for this.

Warranty: in line with ACCC guidelines
